(54) WASHING MACHINE HAVING DETACHABLE WASHING BUCKET

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a washing machine that the washing with much stain are independently stored and washed.

SOLUTION: The washing machine is provided with a housing 205, an outer tub 205 storing washing water, a rotary tub 220 stored in the outer tub 205, a motor 230 generating driving power, a pulsator 250 generating a spiral water stream in the rotary tub 220 and a freely detachable washing bucket 100 which is fitted to the upper part of the pulsator 250, stores the washing with much stain and executes washing. The washing bucket 100 is provided with a cylindrical main body where a washing brush is formed on its inner wall, a washing bucket cover is connected by hinge in the upper part of the main body, multiple guide pins which are extended downward from the bottom surface of the main body and inserted to the pulsator 250 are formed on the bottom surface and the packet is surely fixed to the pulsator by a bolt.

LEGAL STATUS

[Date of request for examination] 10.02.1998

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number] 3027707

[Date of registration] 28.01.2000

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
